## Introduction

Zone 7 Water Agency (Zone 7) is one of the 10 active zones of the Alameda County Flood Control and Water Conservation District (ACFC&WCD). Its jurisdiction boundary map is shown in Exhibit A. Zone 7 is governed by a seven-member board of directors (Zone 7 Board). Each director is elected at-large by residents within Zone 7's service area to a four-year term. The Zone 7 Board sets policy and provides direction to agency management and staff. In 2010, Zone 7's operating budget was about \$50 Million; it employs approximately 106 employees.

Zone 7 is responsible for wholesaling treated and untreated water supply, managing the ground water basin, and providing flood control to the Livermore-Amador Valley. Zone 7 supplies treated water to local retailers who in turn distribute it to the community, as well as provide untreated water for local agriculture. The retail water agencies contracting with Zone 7 for treated water include the City of Pleasanton, the City of Livermore, Dublin San Ramon Services District, and the California Water Service Company.

Water for the Livermore-Amador Valley currently comes from three primary sources: imported surface water from the State Water Project (SWP), local runoff from the Arroyo del Valle, and local groundwater. Zone 7 is one of 29 State Water Project contractors. SWP water is either served directly to customers as untreated or treated water, or stored for later use (in Lake Del Valle, the local groundwater basin, or groundwater banks in Kern County). Zone 7 shares water rights for available flows in the Arroyo del Valle with Alameda County Water District. The local runoff from the Arroyo del Valle is captured in Lake Del Valle under agreements with the State Department of Water Resources. After storage in Lake Del Valle, this runoff is either treated and used directly, or recharged into the local groundwater basin for later recovery. Zone 7 only pumps groundwater that it has artificially recharged.

Zone 7 serves a population of approximately 220,000 in a service area comprised of approximately 430 square miles in the eastern section of Alameda County that includes Pleasanton, Livermore, Dublin and parts of San Ramon (Dougherty Valley area) as well as the surrounding unincorporated Alameda County lands. Zone 7 is responsible for approximately 42 linear miles of pipeline and 36 linear miles of flood control channels and drainage facilities. These channels consist primarily of enlarged natural channels or excavated new channels. Some channels have enhanced landscaping and trails which are open to the public.

## The Regional Planning Process

Zone 7 again joined with the Association of Bay Area Governments (ABAG) to update the existing regional or Multi-Jurisdictional Local Hazard Mitigation Plan ((M-J LHMP.) The participation started in June 2009 and has continued through to 2011. Many of the activities conducted by Zone 7 were fed into the planning process for the multi-jurisdictional plan.

Specifically, we have participated in the following workshops, conferences, and meetings:

- Attended ABAG Water Workshop meeting of March 25, 2009
- Provided letter of Commitment with the Multi-Jurisdictional Local Hazard Mitigation Plan on June 17, 2009
- Attended ABAG Flooding Workshop on July 7, 2009

At these workshops Zone 7 staff provided input on the regional strategies from the perspective of a water service agency. For more information on these meetings and for rosters of attendees, please see Appendix A and H in the ABAG M-J LHMP 2010.

As part of the collaborative effort, Zone 7 also provided:

- Critical Facilities Data update on June 19, 2009
- Mitigation Strategies publically reviewed at Zone 7 Water Agency Board meeting on December 16, 2009

## **The Local Planning Process**

The local planning process was started by a Safety Technician, an Emergency and Safety Supervisor, and an Associate Engineer updating the Critical Facilities Data in June 2009. The existing list of critical facilities from 2005 and new facilities built since and/or were turned over to Zone 7 since 2005, were reviewed and needed changes were incorporated into the 2010 Critical Facilities data list. This list was given to ABAG for inclusion in the M-J LHMP. Exact locations are not presented due to public access to the information. The sites are represented as points in the general area of location for security reasons.

The 2005 Mitigation Strategies were reviewed by staff from Groundwater Section, Water Supply Engineering, Flood Control Section, the Office of the General Manager, Environmental Permitting & Planning, Financial and Systems Services, and the Accounting Section. The group was made up of engineers, geologists, hydro geologists, a communications specialist, a senior staff analyst, the Accounting Manager, and safety technicians. Over the course of 2 ½ months people met to discuss the strategies and agree on what was appropriate for Zone 7 for the 2010 list.

Hydro Geologists from the Groundwater Section gave input on existing and planned wells plus the Well Master Plan. Engineers from the Water Supply Engineering Section gave comments on the Urban Water Management Plan, Capital Improvement Program and proposed construction.

The Flood Control Section discussed the JEPA or Joint Exercise of Powers Agreement for aquatic pesticides and flood control related issues such as infrastructure damages from major storms. From the Office of the General Manager, a Communications Specialist discussed outreach programs and Environmental Permitting and Planning section discussed the Clean Water Program. Additionally, one Associate Engineer provided comments on the Streams Management Master Plan.

The 2005 Mitigation Strategies were compared to known policies or programs and recommendations were made about strategies and priorities. Next, the subject matter experts were brought in for one on one discussion about their recommendations. Their comments were incorporated in the strategies document. Lastly the entire package of updated strategies was routed to representatives from the various sections and executive management for comment.

## ***Process for Updating Plan Sections***

Two staff members led a complete review of the Annex to evaluate whether the information contained within the sections was current and correct. This team met with subject matter experts for each section and requested specific input on sections pertaining to their expertise. The plan will again be monitored over the next 5 years for any necessary changes.

The public has been included in the update process through Zone 7's Board meetings and website. Zone 7 provides opportunity for public comment through a public hearing. The Board specifically requests public comments during an agenda item, but prior to taking any action. Zone 7's website links to Zone 7's LHMP and the ABAG M-J LHMP, and has contact information for anyone who wishes to discuss either plan.

## ***Review of Existing Plans & Studies***

As outlined above, subject matter experts were called to provide comment on existing plans and studies. Their comments were captured in Mitigation Activities and On-Going Mitigation Activities portion of this Annex. The following plans were reviewed in the development of this annex.

| <b>Existing Plans, Studies, Reports, and Technical Information</b> | <b>Method of Incorporation into the Jurisdiction Annex</b>   |
|--|--|
| Capital Improvement Program  | This was used to determine whether projects were currently viable or would need to be deferred due to lack of funding  |
| Water System Master Plan   | This study provides information on how much water we will need to secure, to provide water to the community. It is used in our reliability studies.  |
| Urban Water Management Plan  | This plan is used for long-term source planning for existing and future needs. It is a 20 year planning document that includes scenarios with normal rainfall, dry (drought) and multiple dry years. |
| Asset Management Plan  | This is used to evaluate the life of our equipment and used to schedule asset replacement projects to maintain a reliable water system.  |
| Stream Management Master Plan                                      | This Plan provides a regional response to flood control and as well as trails and environmental enhancements   |
| Strategic Plan   | This document is adopted by our Board of Directors and it sets agency priorities.  |

## **Public Meetings**

Zone 7 provided two opportunities for public input. DRAFT mitigation strategies (included as Exhibit C) were provided at Zone 7's December 16, 2009, Board meeting and on Zone 7's website. Zone 7 Board meetings are held at 7:00 pm on the third Wednesday of every month, are open to the public, and are posted 5 days before the meeting. The Strategies are permanently posted to our website with contact information and a link to ABAG's M-J LHMP. The Draft Annex will also be posted and available for public comment. Zone 7 hopes that by providing information concerning the LHMP it will inform the public about what hazards are present for water and flood control systems, and what is being done to mitigate those hazards. Public comment was received from the internet posting but not at the public hearing. A copy of the internet posting is included as Exhibit B to the Zone 7 2010 Annex.

The Zone 7 Board of Directors will consider adopting the full plan in a public meeting via an official Resolution after approval by FEMA.

## **Hazards Assessment**

Zone 7 has reviewed the hazards identified and ranked those hazards based on past disasters and expected future impacts. The conclusion is that earthquakes (particularly shaking), flooding (including dam failure), landslides (including unstable earth), and wildfires pose a significant risk for potential loss. Severe drought, though a potential problem for Zone 7 operations, is not fully assessed as part of the M-J LHMP. Zone 7 has prepared a Water Shortage Contingency Plan, as part of the required 2010 Urban Water Management Plan (UWMP). The 2010 UWMP was adopted by the Zone 7 Board in December 2010. Zone 7 is continuing to assess its ability to provide reliable services during a severe drought as part of its Water System Master Plan update, which is scheduled to be completed in March/April 2011.

Zone 7 does not believe it faces any natural disasters not listed in the ABAG multi-jurisdictional plan; however, the multi-jurisdictional plan did not include specifics on water treatment and distribution facilities. Specific water distribution, water supply, and water source issues were not addressed. A discussion of these issues and hazards can be found in the Mitigation Activities and Priorities section below.

While Zone 7 has access to maps concerning earthquakes and dam failure, they are less encompassing and not as current as those shown on the ABAG website at <http://quake.abag.ca.gov/mitigation>. The ABAG maps were therefore used for the assessment.

## **Past Occurrences of Disasters (natural and human-induced)**

More information on State and Federally declared disasters in the Zone 7 area can be found at <http://quake.abag.ca.gov/mitigation/ThePlan-D-Version-December09.pdf>.

The disaster history of our area is included in the ABAG website for Alameda County at <http://quake.abag.ca.gov/mitigation/disaster-history.html>. Specifically, Zone 7 has experienced earthquake and flooding damages. One water treatment plant sustained earthquake damage to a clarifier which resulted in the plant being unable to process water for 30 days. Flood control channels experienced slopes failures and silting caused by extreme rainfall.

Specific flooding events that impacted Zone 7 are:

| Year | Disaster  |                        | Total Project Costs |
|------|-----------|------------------------|---------------------|
| 1995 | 1044/1046 | Channel slope failures | \$2,000,000         |
| 1997 | 1155      | Channel slope failures | \$325,000           |
| 1998 | 1203      | Channel slope failures | \$2,500,000         |
| 2006 | 1646      | Channel slope failures | \$1,700,000         |

We have experienced other local storm drainage related issues but have been able to respond to them under our annual routine maintenance program.

## **Risk Assessment**

### ***Urban Land Exposure***

Zone 7 has no jurisdiction over Urban Land exposure. We only have control over the facilities we own or that are owned by Alameda County on our behalf, which are discussed in another area. We are a Water Wholesaler and Flood Control District and have no general plan nor do we control development within our area of influence.

### ***Infrastructure Exposure***

This section is not applicable for a water agency; however, in 2005 Zone 7 had 35 miles of transmission pipe lines and now has 42 miles in 2011. These lines have been included with municipal and county roads in other annexes.

## Exposure of Zone 7 -Owned Buildings

Zone 7 reviewed the various regional hazard maps found at the ABAG website at <http://quake.abag.ca.gov/mitigation/> and <http://www.abag.ca.gov/cgi-bin/pickmapx.pl> to examine the hazard exposure of the Agency's facilities. The following number of facilities is exposed to the various hazards analyzed.

*Note that there is a 5-year lag in the data so the 2010 plan is using 2005 data and the 2005 plan used 2000 data.*

| <b>Exposure (number of facility types)</b>  |  |                       |
|---|--|-----------------------|
| <b>Hazard</b>   | <b>Locally owned critical facilities</b> |                       |
|   | <b>Plan Year 2005</b>                    | <b>Plan Year 2010</b> |
| Total Number of Facilities  | 31                                       | 34                    |
| Earthquake Shaking (within highest two shaking categories)                                    | 11                                       | 10                    |
| Liquefaction Susceptibility (within moderate, high, or very high liquefaction susceptibility) | 11                                       | 23                    |
| Liquefaction Hazard (within CGS study zone)   | N/A                                      | 9                     |
| Earthquake-Induced Landslides (within CGS study zone) <sup>1</sup>                            | 0  | 0                     |
| Earthquake Faulting (within CGS zone)   | 2  | 0                     |
| Flooding (within 100 year floodplain)   | 3  | 0                     |
| Flooding (within 500 year floodplain)   | 0  | 9                     |
| Landslides (within areas of existing landslides)  | 4  | 0                     |
| Wildfires (subject to high, very high, or extreme wildfire threat)                            | 25                                       | 18                    |
| Wildland-Urban Interface Fire Threat  | 10                                       | 0                     |
| Dam Inundation  | 8  | 16                    |
| Sea Level Rise (exposed to 16-in sea level rise) <sup>2</sup>                                 | -  | 0                     |
| Sea Level Rise (exposed to 55-in sea level rise) <sup>3</sup>                                 | -  | 0                     |
| Tsunamis <sup>4</sup> (within inundation area)  | -  | 0                     |
| Drought <sup>5</sup>  | -  | -                     |

## Repetitive Loss Properties

Not applicable for a water agency.

<sup>1</sup> The California Geological Survey continues to map Alameda County and added the Livermore-Altamont area in late 2009. Though some areas of the County have not yet been completely mapped, the densely populated areas in Alameda County are mostly done.

<sup>2</sup> Sea level rise data was not available in 2005

<sup>3</sup> Sea level rise data was not available in 2005

<sup>4</sup> Tsunami evacuation planning maps were not available inside the San Francisco Bay in 2005. This map became available in December 2009. It should be noted that this map is not a hazard map and should be used for evacuation planning purposes only. The inundation line represents the highest inundation at any particular location from a suite of tsunami sources. It is not representative of any single tsunami.

<sup>5</sup> Drought will not damage locally owned facilities directly.

## ***Other risks***

Severe drought, as discussed in Hazards earlier in this document, is a potential problem for Zone 7 operations and it is not fully assessed as part of the M-J LHMP Annex. After adoption, Zone 7 submitted the 2010 update to its Urban Water Management Plan (UWMP) to the Department of Water Resources on December 23, 2010. The UWMP includes a Water Shortage Contingency Plan that discusses how Zone 7 will manage partial or catastrophic losses of water supply during drought or other emergency conditions. The UWMP was developed with the retail water agencies and was reviewed by other public agencies in the service area.

## **National Flood Insurance Program**

Zone 7 is not a flood plain manager; however, Zone 7 supports the efforts of the four flood plain managers in our area.

## **Mitigation Goals and Objectives**

The goal of the ABAG M-J LHMP is to maintain and enhance a disaster-resistant region by reducing the potential for loss of life, property damage, and environmental degradation from natural disasters, while accelerating economic recovery from those disasters. This goal is unchanged from the 2005 plan and continues to be the goal of Zone 7 in designing its mitigation program.

Additionally, Zone 7 has the specific objective of improving water production facilities and appurtenances that are vulnerable to the effects of earthquakes and flooding damages in order to provide a reliable water supply even under a natural disaster.

## **Mitigation Activities and Priorities**

### ***Evaluation of Progress from 2005 Plan***

In 2005, mitigation actions and priorities were identified. The following gives an update on several of those strategies including actions taken and the current status. The reference numbers at the end of each item correlates to the Mitigation Strategy number involved.

Water System Reliability Assessment (July 1994) – This report provided an assessment of how the Zone 7 Water System may respond under various earthquake conditions, including earthquake induced power outages and fires. The report examined 10 different scenarios of earthquakes. Each scenario was associated with a particular fault and magnitude. The assessment provided information useful for determining system upgrades strategies and priorities. The report generated facility upgrades and replacement work, much of which has been completed. Two notable upgrades are still needed. One is the replacement of the clarifier fiberglass panels at the Patterson Pass Water Treatment Plant (PPWTP). Zone 7 is undertaking a project to replace the entire clarifier mechanism in 2011. The other upgrade is at the superpulsator sedimentation basins at the Del Valle Water Treatment Plant. Zone 7 has a capital improvement project to reassess and improve reliability of the superpulsator basins. It should be

noted that the initial concerns with the reliability of the superpulser basins have been partially offset by construction of parallel dissolved air flotation (DAF) basins in 2007. (INFR c-1)

#### Seismic Upgrade Project (May 1996), Update for October 2010

- 1) Installed an interconnection with the City of Livermore water system at our PPWTP. (The City's reservoirs meet current seismic code). During a significant seismic event we would most likely lose our washwater tank on the hill. To seismically retrofit it would cost as much as a new tank. The interconnection allows us a safety net until we have the financial resources to replace the existing washwater tank.
- 2) Installed an emergency bypass line for the Ultrafiltration Water Treatment Plant (UFWTP) around the clearwell. If the clearwell were to fail during a seismic event we would now be able to keep the UFWTP running by bypassing the clearwell. (INFRA a-4)

Altamont Pipeline Livermore Reach (APLLIV) Project - The APLLIV alignment is the first phase of an 11-mile pipeline connecting a future treatment plant to the Zone 7 water transmission system. This first phase alignment is approximately 5.6 miles of 42-inch diameter welded steel pipe (mostly double lap welded). APLLIV was completed in August 2009 and is operational. It was constructed to increase Zone 7's reliability to meet demands in the eastern service area when the South Bay Aqueduct (SBA) is shut down due to planned/unplanned outages or has limited flows due to regulations to protect fish habitat in the Delta. APLLIV allows the transfer of water from the west side sources (Zone 7 municipal wells and Del Valle Water Treatment Plant (DVWTP)) to the east side of the Zone 7 transmission system, providing additional reliability to the east side in case of PPWTP outages. APLLIV also increases Zone 7's transmission system reliability by providing another loop in the transmission system by connecting to Zone 7's existing 36-inch Cross Valley Pipeline near Kittyhawk Road in Livermore, and 18-inch Vasco Pipeline located in Vasco Road, in Livermore. (INFRA c-1)

#### Emergency Generator (June 2004), Update October 2010

- 1) Installed a standard method of electrical connection for emergency generators at all major well facilities (Mocho Wells 3 and 4, Hopyard Well 6, Stoneridge Well, and Chain-of-Lakes Wells). These connections allow us to bring portable generators onsite in the event of an emergency/electrical outage.
- 2) Installed an additional 500 KW generator at DVWTP. This now enables the plant to be fully operational during an emergency/electrical outage. (INFRA a-4;a-11;b-6)

Vulnerability Assessment Study (2003) - Progress has been accomplished in the last 5 years to reduce agency vulnerabilities; new controls have been installed and existing systems have been repaired. (GOV - a1, a9)

### ***Future Mitigation Actions and Priorities***

As a participant in the 2010 ABAG multi-jurisdictional planning process, the staff of Zone 7 helped in the development and review of the comprehensive list of mitigation strategies in the overall multi-jurisdictional plan. The decision on priority was made based on a variety of

criteria, not simply on an economic cost-benefit analysis. These criteria include being technically and administratively feasible, politically acceptable, socially appropriate, legal, economically sound, and not harmful to the environment or our heritage. Representatives from multiple sections described in the Planning Process section then met to review progress on Zone 7's 2005 strategies, and to identify and prioritize additional mitigation strategies to update the list.

These draft priorities were submitted to Zone 7 Executive Management and Zone 7 Board of Directors. The draft priorities will be provided to the Board of Directors for adoption pending approval of this LHMP by FEMA.

The Zone 7 planning team also prioritized specific mitigation tasks for the next 5 years. They looked at projects specific to Zone 7 that had potential funding and were included in the Capital Improvement Program and other strategies that did not have foreseeable funding but were listed as a potential mitigation for Zone 7. The strategies include programs, policies, resolutions and/or mandates for implementation of funded projects. Comments were provided on those mitigations not yet funded or not appropriate for water agencies.

### ***On-Going Mitigation Strategy Programs***

Zone 7 has many on-going mitigation programs that help create a more disaster-resistant region. The following list highlights those programs identified as *Existing Programs* in the mitigation strategy spreadsheet.

Water System Master Plan – Zone 7 is currently conducting an assessment of its ability to meet projected water demands at build out. The assessment is to determine future water supply, conveyance, and facility needs to meet customer reliability/level of service goals. The Water System Master Plan will become a working document that prioritizes and schedules defined projects with ongoing progress updates towards meeting water supply and facility needs at build out. (INFRA c-1)

Streams Management Master Plan SMMP (2006) – The SMMP is a multi-disciplinary approach to stream management in the Zone 7 area. Flood Protection and Drainage, Erosion and Sedimentation, Water Supply, Water Quality Habitat & Environment and Recreation, Trails & Education were addressed. Channels were evaluated based on hydraulic properties and existing knowledge of flooding history. Specific methods of improvement that would span the range of disciplines being addressed were evaluated for each project site. The alternatives ranged from storage options to creating stormwater by-pass channels. This project involved a variety of public workshops to draw together all interested public and private stakeholders to participate in the process. An EIR was prepared that examined the various alternatives for all 45 projects identified in the SMMP. Funding options are being explored to complete the recommended projects. Further evaluation of individual projects as well as prioritization based on need is on-going. (INFR –d-1; d9; ENVI-a4, a5)

Emergency Operation Plan - The plan is updated every year with new contact information for regulatory agencies, contractors, service providers, and chemical vendors. A full review of the document is anticipated in 2011. (GOV – b1)

Asset Management Plan Update (March 2011) – The Asset Management Plan (AMP) update is in progress, and this report which will contain long-term asset renewal funding requirements and near-term asset renewal projects for inclusion in the ten-year Capital Improvement Program. The work includes: an evaluation of Zone 7's inventory of capital assets; development of methodologies and decision processes for asset renewal; condition assessment of key water treatment and distribution assets; risk analysis of below-ground assets (i.e., pipelines); development of the annual allowance necessary to adequately fund Renewal/Replacement projects over the long term; and comparison of the necessary funding level with the existing funding allowance. This effort is being performed in collaboration with Zone 7 Engineering, Maintenance & Operations, Finance staff, and Zone 7 Retailers. (INFRA a-4; GOV- a2)

Joint Exercise of Powers Agreement (JEPA) - Zone 7, along with Contra Costa County, Contra Costa County Flood Control and Water Conservation District, ACFC&WCD, City of Antioch, and the City of Concord, worked together under JEPA to request an NPDES (National Pollution Discharge Elimination System) Permit to apply aquatic pesticides to control undesirable vegetation in channels. Undesirable vegetation must be controlled to maintain design flow capacities, reduce silt deposition, and reduce erosion damages to the embankments of channels. This program was initiated in 2003, extended 5 years in 2004, and has now been extended for 2 more years through 2011.

Additionally Zone 7 pursues mechanical vegetation removal for isolated areas where chemical control is too broad a treatment. (ENVI a-13)

Alameda Countywide Clean Water Program – Alameda Countywide Clean Water Program (ACCWP) is a consortium of 14 cities and two flood control agencies, including Zone 7, within Alameda County that discharge storm water to the San Francisco Bay. On October 14, 2009, the Municipal Regional Stormwater NPDES Permit (MRP) was issued by the Regional Water Quality Control Board, an executive agency of the State of California. The MRP regulates the discharge of storm water runoff from the municipal separate storm sewer systems maintained by a total of 76 cities, counties, and flood control districts within the jurisdiction of six Bay Area regional stormwater programs, including ACCWP. The MRP specifies the actions necessary to reduce discharge of pollutants in stormwater to the maximum extent practicable, in a manner designed to achieve compliance with water quality standards and objectives, and effectively prohibit non-stormwater discharges into municipal storm drain systems and watercourses within the Permittees' jurisdiction. The MRP includes requirements for the following components applicable to Zone 7: Municipal Operations, New Development and Redevelopment, Illicit Discharge and Elimination, Construction Site Controls, Public Information and Outreach, Water Quality Monitoring, Trash Reduction, and Exempt and Conditionally Exempt Discharges. Complying with the MRP requirements provides the benefit of reducing damage related to flooding. (INFR - d8)

## **Incorporation into Existing Planning Mechanisms**

Zone 7 has several planning mechanisms that provide support for the LHMP. These were identified in the section Review of Existing Plans & Studies.

Zone 7 uses these pre-existing programs to assist in the classification and prioritization of system facilities. These facilities are evaluated for potential hazards, renewal/replacement, and system-wide improvements and expansion strategies. Therefore, the mitigation actions identified in this plan will be carried out primarily through those existing plans and programs. In addition, Zone 7

enforces the requirements of the California Environmental Quality Act (CEQA), which, since 1988, requires mitigation for identified natural hazards.

## **Plan Update Process**

As required by the Disaster Mitigation Act of 2000, Zone 7 will update this plan annex at least once every five years, by participating in a multi-agency effort with ABAG and other agencies to develop a multi-jurisdictional plan.

Zone 7 will continue to monitor this Annex. The plan will be monitored on an on-going basis by Agency staff as described in the Local Planning Process section. However, the major disasters affecting our community, legal changes, notices from ABAG as the lead agency on this process, and other triggers will be used. Zone 7 Executive Management will be responsible for determining if the plan should be updated.

Zone 7 is committed to reviewing and updating this plan annex at least once every five years, as required by the Disaster Mitigation Act of 2000. Zone 7 will contact ABAG four years after this plan is approved to ensure that ABAG plans to undertake the plan update process. If so, Zone 7 again plans to participate in the multi-jurisdictional plan. If ABAG is unwilling or unable to act as the lead agency in the multi-jurisdictional effort, other agencies will be contacted, including the County's Office of Emergency Services. Counties should then work together to identify another regional forum for developing a multi-jurisdictional plan.

The public will continue to be involved whenever the plan is updated and as appropriate during the monitoring and evaluation process. Prior to adoption of updates, Zone 7 will provide the opportunity for the public to comment on the updates. A public notice will be posted prior to the meeting to announce the comment period and meeting logistics. All documents and links relating to the LHMP will be permanently available on Zone 7's website. The hope is to gain public confidence and awareness for disaster related issues, while providing information on the work effort Zone 7 has undertaken to mitigate impacts.

## **Mitigation Plan Point of Contact**

Name: Diana Gaines

Title: Senior Engineer

Mailing Address: 100 North Canyons Parkway, Livermore, CA 94551

Telephone: (925) 454-5021

Email: [dgaines@zone7water.com](mailto:dgaines@zone7water.com)

### ***Alternate Point of Contact***

Name: Sara Whatley

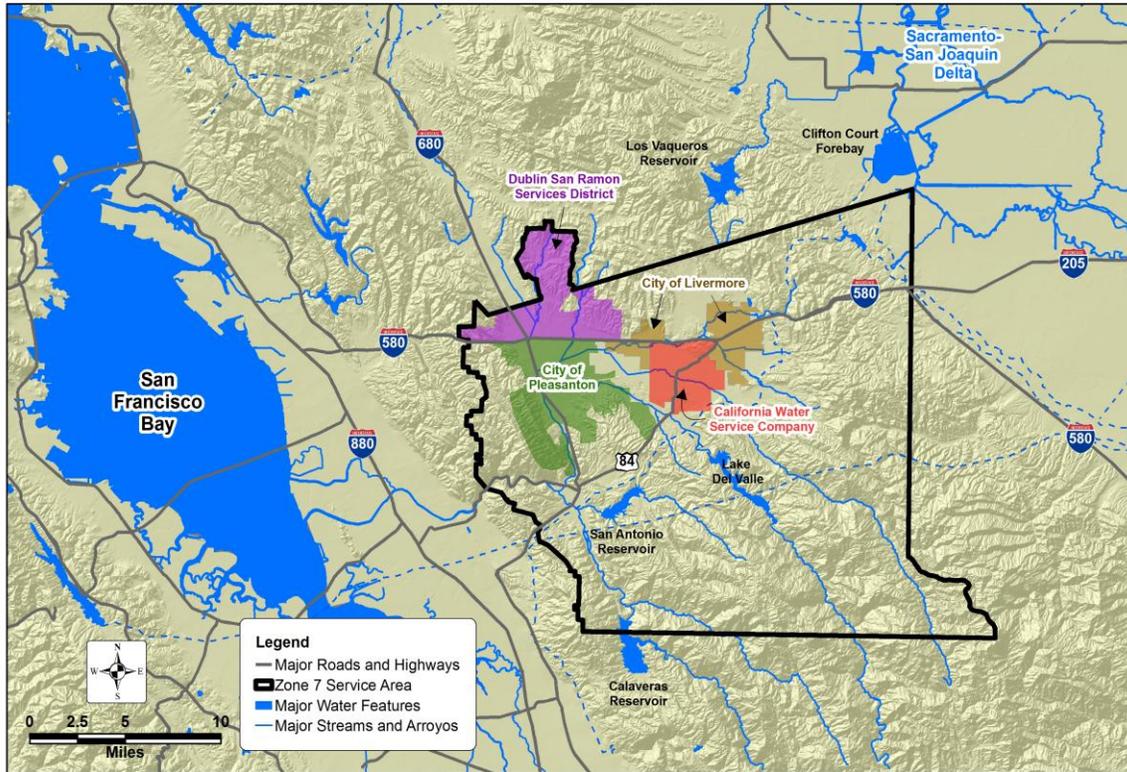

Title: Safety Technician

Mailing Address: 100 North Canyons Parkway, Livermore, CA 94551

Telephone: (925) 454-5025

### Local Hazard Mitigation Plan Update

The federal Disaster Mitigation Act of 2000 requires cities, counties and special districts to have a Local Hazard Mitigation Plan to minimize damage and quicken recovery from disasters such as earthquakes and floods, and to be eligible for federal hazard mitigation funds. The Association of Bay Area Governments is the lead agency on a multi-jurisdictional LHMP for the region. This plan, including Zone 7's piece, was created in 2005 and is in the process of being updated.

- To view the existing Bay Area plan, along with maps that show earthquake- and flood-prone areas, [click here](#).
- To view Zone 7's draft mitigation strategy update, [click here](#).
  - Comments on Zone 7's draft plan can be made by Dec. 16 by emailing Diana Gaines at [dgaines@zone7water.com](mailto:dgaines@zone7water.com) or Sara Whatley at [swhatley@zone7water.com](mailto:swhatley@zone7water.com), or by attending the Zone 7 Board meeting at 7 p.m. Dec 16 at 100 North Canyons Parkway, Livermore. There will be additional opportunity for input until final Board adoption, expected in Spring 2010.

| a-21                          | new                           | <b>As an infrastructure operator, designate a back-up Emergency Operations Center with redundant communications systems.</b>  | EQ LS<br>WF FL<br>SEC | X                |                               |   |                                     |          |             |  |                    |   |  |
| a-22                          | new                           | <b>Monitor scientific studies of the Sacramento-San Joaquin Delta and policy decisions related to the long-term disaster resistance of that Delta system to ensure that decisions are made based on comprehensive analysis and in a scientifically-defensible manner. Levee failure due to earthquakes, flooding, and climate change (including sea level rise and more frequent and more severe flooding) are all of concern. The long-term health of the Delta area is critical to the Bay Area's water supply, is essential for the San Francisco Bay and estuary's environmental health, provides recreation opportunities for Bay Area residents, and provides the long-term sustainability of Delta communities. While only part of the Delta is within the nine Bay Area counties covered by this multi-jurisdictional LHMP, the Delta is tied to the infrastructure, water supply, and economy of the Bay Area.</b> | EQ FL                 | X                |                               |   |                                     |          |             |  |                    |   |  |
| <b>INFR - b - Earthquakes</b> |                               |   |                       |                  |                               |   |                                     |          |             |  |                    |   |  |
| b-1                           | b-1                           | Expedite the funding and retrofit of seismically-deficient city- and county-owned bridges and road structures by working with Caltrans and other appropriate governmental agencies.   | EQ                    |                  |                               |   |                                     |          | X           |  |                    | not applicable for a water agency   |  |
| b-2                           | b-2                           | Establish a higher priority for funding seismic retrofit of existing transportation and infrastructure systems (such as BART) than for expansion of those systems.  | EQ                    |                  |                               |   |                                     |          | X           |  |                    | not applicable for a water agency   |  |
| b-3                           | b-3                           | Include "areas subject to high ground shaking, earthquake-induced ground failure, and surface fault rupture" in the list of criteria used for determining a replacement schedule for pipelines (along with importance, age, type of construction material, size, condition, and maintenance or repair history).   | EQ                    | X                |                               |   |                                     |          |             |  |                    |   |  |
| b-4                           | b-4                           | Install specially-engineered pipelines in areas subject to faulting, liquefaction, earthquake-induced landsliding, or other earthquake hazard.  | EQ                    |                  | X                             |   |                                     |          |             |  |                    |   |  |
| b-5                           | b-5                           | Replace or retrofit water-retention structures that are determined to be structurally deficient, <b>including levees, dams, reservoirs and tanks.</b>   | EQ                    |                  | X                             |   |                                     |          |             |  |                    |   |  |

|---|-------------------------------|---|--------------------|--------------------|-------------------------------|---|-------------------------------------|----------|-------------|--|--------------------|--|---|---|--|-----------------------------------|--|
|   |                               |   |                    | Existing Program   | Existing Program, underfunded | Very High - Unofficial Program - Becomes Official on Plan Adoption, no funding needed | High - Actively Looking for Funding | Moderate | Under Study | Not Appropriate, or Not Cost Effective | Not Yet Considered |  |   |   |  |                                   |  |
| <b>HSNG - e - Other Privately-Owned Structurally Vulnerable Residential Buildings and Earthquakes</b> |                               |   |                    |                    |                               |   |                                     |          |             |  |                    |  |   |   |  |                                   |  |
| e-1   | e-1                           | Identify and work toward tying down mobile homes used as year-round permanent residences using an appropriate cost-sharing basis (for example, 75% grant, 25% owner).   | EQ                 |                    |                               |   |                                     |          |             |  |                    |  | X |   | not applicable for a water agency  |                                   |  |
| e-2   | e-2                           | Inventory non-ductile concrete, tilt-up concrete (such as converted lofts), and other privately-owned potentially structurally vulnerable residential buildings.  | EQ                 |                    |                               |   |                                     |          |             |  |                    |  |   | X   |  | not applicable for a water agency |  |
| e-3   | e-3                           | Adopt the 2009 International Existing Building Code or the latest applicable standard for the design of voluntary or mandatory retrofit of privately-owned seismically vulnerable buildings.  | EQ                 |                    |                               |   |                                     |          |             |  |                    |  |   | X   |  | not applicable for a water agency |  |
| e-4   | e-4                           | Adopt one or more of the following strategies as incentives to encourage retrofitting of privately-owned seismically vulnerable residential buildings: (a) waivers or reductions of permit fees, (b) below-market loans, (c) local tax breaks, (d) grants to cover the cost of retrofitting or of a structural analysis, (e) land use (such as parking requirement waivers) and procedural incentives, or (f) technical assistance. | EQ                 |                    |                               |   |                                     |          |             |  |                    |  |   | X   |  | not applicable for a water agency |  |
| <b>HSNG - f - New Construction and Earthquakes</b>  |                               |   |                    |                    |                               |   |                                     |          |             |  |                    |  |   |   |  |                                   |  |
| f-1   | f-1                           | Continue to require that all new housing be constructed in compliance with (deleted "structural") requirements of the most recently adopted version of the California Building Code.  | EQ                 |                    |                               |   |                                     |          |             |  |                    |  |   | X   |  | not applicable for a water agency |  |
| f-2   | f-2                           | Conduct appropriate employee training and support continued education to ensure enforcement of building codes and construction standards, as well as identification of typical design inadequacies of housing and recommended improvements.   | EQ                 |                    |                               |   |                                     |          |             |  |                    |  |   | X   |  | not applicable for a water agency |  |
| <b>HSNG - g - Wildfire and Structural Fires</b>   |                               |   |                    |                    |                               |   |                                     |          |             |  |                    |  |   |   |  |                                   |  |
| g-1   | g-1                           | Increase efforts to reduce hazards in existing private development in wildland-urban-interface fire-threatened communities or in areas exposed to high-to-extreme fire threat through improving engineering design and vegetation management for mitigation, appropriate code enforcement, and public education on defensible space mitigation strategies.  | WF                 |                    |                               |   |                                     |          |             |  |                    |  |   | X   |  | not applicable for a water agency |  |
| g-2   | g-2                           | Tie public education on defensible space and a comprehensive defensible space ordinance to a field program of enforcement.  | WF                 |                    |                               |   |                                     |          |             |  |                    |  |   | X   |  | not applicable for a water agency |  |

### Draft Housing Mitigation Strategies

| 2009-2010 Strategy Number | 2005 Original Strategy Number | Specific Mitigation Strategy  | Applicable Hazards | Existing Program | Existing Program, underfunded | Very High - Unofficial Program - Becomes Official on Plan Adoption, no funding needed | High - Actively Looking for Funding | Moderate | Under Study | Not Appropriate, or Not Cost Effective | Not Yet Considered | Responsible Agency or Department (Required if Existing Program, Existing Program under funded, Very High, High, or Under Study) | Ordinance or Resolution # (if existing program), Estimated Cost and Possible Funding Agency (if high priority), Estimated Date of Completion (if study), WHY if not same as regional priority, OR Other Comments |
|---------------------------|-------------------------------|---|--------------------|------------------|-------------------------------|---|-------------------------------------|----------|-------------|--|--------------------|---|--|
| g-3                       | g-3                           | Require that new homes in wildland-urban-interface fire-threatened communities or in areas exposed to high-to-extreme fire threat be constructed of fire-resistant building materials (including roofing and exterior walls) and incorporate fire-resistant design features (such as minimal use of eaves, internal corners, and open first floors) to increase structural survivability and reduce ignitability. <b>Note</b> - See Structural Fire Prevention Field Guide for Mitigation of Wildfires at <a href="http://osfm.fire.ca.gov/structural.html">http://osfm.fire.ca.gov/structural.html</a> . | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-4                       | g-4                           | Create or identify "model" <b>properties showing defensible space and structural survivability</b> in neighborhoods that are wildland-urban-interface fire-threatened communities or in areas exposed to high-to-extreme fire threat.   | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-5                       | g-5                           | Consider fire safety, evacuation, and emergency vehicle access when reviewing proposals to add secondary units or additional residential units in wildland-urban-interface fire-threatened communities or in areas exposed to high-to-extreme fire threat.  | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-6                       | g-6                           | Adopt and amend as needed updated versions of the <i>California Building and Fire Codes</i> so that optimal fire-protection standards are used in construction and renovation projects <b>of private buildings</b> .  | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-7                       | g-7                           | Create a mechanism to enforce provisions of the <i>California Building and Fire Codes</i> and other local codes that require the installation of smoke detectors and fire-extinguishing systems <b>on existing residential buildings</b> by making installation a condition of (a) finalizing a permit for any work valued at over a fixed amount and/or (b) on any building over 75 feet in height, and/or (b) as a condition for the transfer of property.  | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-8                       | g-8                           | Work to ensure a reliable source of water for fire suppression in rural-residential areas through the cooperative efforts of water districts, fire districts, and residents.  | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-9                       | g-9                           | Expand vegetation management programs in wildland-urban- interface fire-threatened communities or in areas exposed to high-to-extreme fire threat to more effectively manage the fuel load through roadside collection and chipping, mechanical fuel reduction equipment, selected harvesting, use of goats or other organic methods of fuel reduction, and selected use of controlled burning.   | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |

### Draft Housing Mitigation Strategies

| 2009-2010 Strategy Number | 2005 Original Strategy Number | Specific Mitigation Strategy  | Applicable Hazards | Existing Program | Existing Program, underfunded | Very High - Unofficial Program - Becomes Official on Plan Adoption, no funding needed | High - Actively Looking for Funding | Moderate | Under Study | Not Appropriate, or Not Cost Effective | Not Yet Considered | Responsible Agency or Department (Required if Existing Program, Existing Program under funded, Very High, High, or Under Study) | Ordinance or Resolution # (if existing program), Estimated Cost and Possible Funding Agency (if high priority), Estimated Date of Completion (if study), WHY if not same as regional priority, OR Other Comments |
|---------------------------|-------------------------------|---|--------------------|------------------|-------------------------------|---|-------------------------------------|----------|-------------|--|--------------------|---|--|
| g-10                      | g-11                          | Establish <b>special funding mechanisms</b> (such as Fire Hazard Abatement Districts <b>or regional bond funding</b> ) to fund reduction in fire risk of existing properties through vegetation management that includes reduction of fuel loads, use of defensible space, and fuel breaks.   | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-11                      | g-12                          | Work with residents in rural-residential areas to ensure adequate <b>plans are developed for appropriate</b> access and evacuation in wildland-urban-interface fire-threatened communities or in areas exposed to high-to-extreme fire threat. <b>For example, in some areas, additional roads can be created, and in other areas, the communities will need to focus on early warning and evacuation because additional roads are not feasible.</b>  | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-12                      | g-13                          | Require fire sprinklers in new homes located more than 1.5 miles or a 5-minute response time from a fire station or in an identified high hazard wildland-urban-interface wildfire area.  | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-13                      | g-14                          | Require fire sprinklers in all new or substantially remodeled multifamily housing, regardless of distance from a fire station.  | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-14                      | g-15                          | Require sprinklers in all mixed use development to protect residential uses from fires started in non-residential areas.  | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-15                      | g-16                          | Compile a list of <b>privately-owned</b> high-rise and high-occupancy buildings which are deemed, due to their age or construction materials, to be particularly susceptible to fire hazards, and determine an expeditious timeline for the fire-safety inspection of all such structures.  | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-16                      | g-17                          | Conduct periodic fire-safety inspections of all multi-family buildings, as required by State law.   | WF                 |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
| g-17                      | g-18                          | Ensure that <b>city/county-initiated</b> fire-preventive vegetation-management techniques and practices for creek sides and high-slope areas do not contribute to the landslide and erosion hazard. <b>For example, vegetation in these sensitive areas could be thinned, rather than removed, or replanted with less flammable materials. When thinning, the non-native species should be removed first. Other options would be to use structural mitigation, rather than vegetation management in the most sensitive areas.</b> | WF LS              |                  |                               |   |                                     |          |             | X                                      |                    | not applicable for a water agency   |  |
