

The background of the slide features a repeating pattern of stylized bears and stars. The bears are depicted in profile, walking towards the right, with a small star above each. The pattern is light teal and covers the entire slide area.

Summary Report on Long-Term Disaster Recovery Planning Survey

**Linda Min
Tranter-Leong Management Intern**

October 2008

Survey Background

Intent:

Assess existing long-term disaster recovery plans and gaps

Why is the survey important now?

140th anniversary of last major movement of Hayward Fault

Local governments need to prepare a comprehensive plan now for long-term disaster recovery

Methodology and Response Rate

- **28 questions**

Deadlines: July 22 & August 29 – but received “last” survey on Oct. 13

- **109 Members**
- **90 Respondents, 83% response rate**

Key Findings

Significant Progress

- 92%** Have designated a department to oversee FEMA reimbursement process
- 76%** Back-ups of key records and other documents
- 70%** General Plan is up-to-date and consistent with local zoning for residential and commercial areas

Mixed Results

62% Back-up finance procedures for making payments

57% Established emergency fund

52% Allow emergency purchases over \$100,000

60% Local Hazard Mitigation Plan adopted as part of General Plan Safety Element

Needs Improvement

36% Documented pre-existing conditions

22% Adopted repair and reconstruction ordinances

16% Financial incentives to strengthen single-family homes

11% Mandate seismic strengthening or provide incentives for multifamily housing

Concluding Remarks

Make long-term recovery a high priority in your jurisdiction!
